

Contents

International Journal of Computer and Electrical Engineering

Volume 7, Number 2, April 2015

- Exploiting Orientational Redundancy in Multiview Video Compression** **70**
Chi Wa Leong, Behnoosh Hariri, Shervin Shirmohammadi
- Robust Stereo Matching Method for Radiometric Distortion between Images** **82**
Phuc Nguyen Hong, Musrrat Ali, Chang Wook Ahn
- Self-Quotient Referential Bilateral Filter and Its Application to Real-Time Face Beautification System** **91**
M. Matsumoto
- Orientation Invariant Object Recognitions Using Geometric Moments Invariants and Color Histograms** **101**
Saleha Samad, Anam Haq, Shoab A. khan
- Compiler Support for Accelerating C++11 Range-Based Loops on Heterogeneous Systems** **109**
Chaturapat Suwancharoen, Worawan Maruringsith
- Attribute Importance Measure Based on Back-Propagation Neural Network: An Empirical Study** **118**
Boonyarat Phadermrod, Richard M. Crowder, Gary B. Wills
- Signature-Based Method and Stream Data Mining Technique Performance Evaluation for Security and Intrusion Detection in Advanced Metering Infrastructures (AMI)** **128**
Ziaeddin Najafian, Vahe Aghazarian, Alireza Hedayati
- Optimized Pre-copy Migration Using STORD for Memory Intensive Environment** **140**

Jae-Geun Cha, Chi-Hoon Shin, Hag-Young Kim
